REC4 Comes with our largest PLC, most valves, and most options of any of our standard test systems. Fully contained powder-coated test console with Windows based Operating system. Allows serial # entry while a cylinder is testing. The console can be configured for the testing of cylinders alternatively or simultaneously. Networking capabilities for cylinder database that can be maintained separate from the console and used to pre-enter cylinder data.

The Test System components designed for the REC4 platform are centered on over 50 years experience in the industry and include components which have proven themselves to be the most reliable and repeatable over time.

Internet connectivity enhances Galiso’s ability to communicate with and properly service our customer’s system. It gives our customer the opportunity to upgrade their software and system over the internet.
