Medical Cylinder Accessories

Clean Air Filter Package provides clean dry air for your cylinder drying package. This takes in your compressor air and filters the air to a class D breathing air.

The PCT-MA is a medical cylinder attachment for our line of PCT-15 and 122 inverter/driers. The PCT-MA processes Medical E, D, and M-6 size cylinders (3.2" to 4.4" diameter, 11.75"to 25.25" tall) and matches the footprint of our GHH-6G-12MT-4 Multi-4 Port Test Head.

4 medical cylinders are processed in the same time it took to process 1 medical cylinder on the PCT-15 and 8 cylinders instead of 2 for the PCT-122. Cylinders can be stamped while clamped in the PCT-MA. The PCT-MA is attached or removed in less than 5 minutes.
