

Welcome!

We at Galiso wish to express how thankful we are for the opportunities that we have been given to provide products and services to our customers since my parents started Galiso in 1962. We are grateful that you are reading our new catalog and look forward to helping you in any way that we can. My Father Carl believed that "time is more important than money" and it is our hope at Galiso that we can use our time to develop a relationship with you that will be a blessing to us both.

Galiso is a company that has been dedicated to Jesus Christ and I am thankful for how he has used this company to teach me many lessons about what really matters in life. I hope that when you work with us that we will experience His grace, His peace, and come to truly know Him.

2012 was our 50th anniversary as a company and recently Rick Wright found this cartoon in one of the many boxes of stuff from the past. I thought that you might enjoy seeing it and think about my father Carl's invention of the Hydraclose test head. It is our hope that this invention, that became a starting point for this company, has or will help you to re-qualify gas cylinders in a safe, efficient and profitable manner.

We are hoping to leverage technology to get to know you better with the simple thought that the better we know you, the better we can work with you. Internet technology has been very helpful to us the last several years in serving the international customer base that we have been blessed with.

As helpful as Technology can be, spending time with someone face to face is still the best, and we wish to encourage you to come for a visit and give us the honor of getting to know you.

Thankfully yours, Charles Grenci - President
